Derivation of human gait
from floor vibrations
(7857771)

Integrating multiple apps on a
shared platform (10180862)

Assimilation method &
system for browser and non-
browser display window
(10901581)

FRACCEL

Founder and CEO

Provide Fractional CTO services to pre-seed and seed stage startups
in central Virginia.

Fractional CTO – Novela Weddings

Fintech that is changing the way weddings are planned, paid for,
and financed.

Fractional CTO – Taste Supply

The Etsy for Specialty Food.

BROKERBOTICS

Co-Founder and CTO

Building the first simple automated options trading platform for retail investors.

11:59

Head of Intelligent Automation

Manage multiple remote first technology teams responsible for innovation efforts such
as automation, AI / ML, modern tooling, rapid product development, prototyping and
going to market.

SKAFOS.AI

Michael Prichard
CEO
skafos.ai

Sidd is one of the rare "unicorns"
that not only understands
software, he also is able to bring
his business acumen and team
leadership to the forefront to get
results.

Vice President of Engineering

Manage and grow a global remote first data science and
software development organization developing an interactive
guided shopping experience powered by visual AI for
eCommerce and crypto platforms.

2022-PRESENT

Adam Healey
CEO
novelaweddings.com

Sidd is a tech lead rockstar. He
seamlessly fits into your
leadership team and creates
positive impact from day one.
Run your software team the right
way – hire Fraccel.

2023-PRESENT

2022-2023

2021-2022

INTEROP.IO (FORMERLY FINESEMBLE)

2016-2021

Director of Solutions Engineering

2020-2021

Managed and grew remote globally located internal and outsourced software development, QA and support teams that help customers – large financial institutions – expedite developing and deploying their solutions built on Finsemble. Finsemble is a platform built to seamlessly unify all your applications regardless of technology used to build them.

Sara Courson

Chief Customer Officer
interop.io

Sidd is a delight to work with. I've seen him dive into some of the gnarliest problems with an attitude that was literally inspiring (no hyperbole)

Product Manager & Development Team Lead

2016-2019

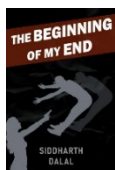

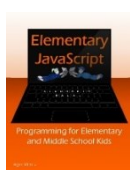

Led a team of globally located developers working on Finsemble. Provided technical leadership, mentorship, recruited developers, and drove product direction.

Product manager and lead developer for ChartIQ Portal - a low code/no code customizable fully functional responsive HTML5 financial portal-in-a-box built using a collection of visual widgets that included financial data.

S1DD.COM

2006-PRESENT

Author & Blogger

Elementary JavaScript: A bestselling kids programming book - <https://s1dd.com/amazon>

The Beginning of My End: A tech thriller ghost story - <https://s1dd.com/bome>.

Blog about renewable energy, finance, education, and other topics at <https://s1dd.com/>.

Wrote professionally for Seeking Alpha and other financial websites for several years.

WORLDSTRIDES

2014-2015

Sr. Developer/Analyst

Managed CRM solution. Developed custom solutions for data analysis, reporting, integration with CRM and other internal systems. Led internal group to formalize the SDLC at WorldStrides.

UNIVERSITY OF VIRGINIA

2002-2014

Worked in healthcare research (big data, non-invasive in-home monitoring, security, publishing research), business operations software (procurement, surplus property, vendor, and payment management), enterprise applications (document imaging, student systems, HR), and infrastructure applications (devops, network management, ITIL).

Senior Systems Engineer – Infrastructure Applications

2013-2014

Application Engineer – Enterprise Applications

2011-2013

Web Application Developer – Procurement Services

2007-2011

Senior Software Engineer – Medical Automation Research Center

2002-2007

INTERNET BOOK DATABASE

2005-2013

Founder

Single-handedly built from ground up and maintained the Internet Book Database, one of the web's largest databases of book information at that time according to Wikipedia.

WELLAWARE SYSTEMS

2008-2009

Co-Founder, Lead Software Engineer

Helped transition the work done at the Medical Automation Research Center at UVA into a commercially viable system.
